Contents

1 Introduction **3**

1.1 References . . . 3

2 Positioning **3**

2.1 Problem Statement . . . 3

2.2 Product Position Statement . . . 3

3 Stakeholder and User Descriptions **3**

3.1 Stakeholder Summary . . . 3

3.2 User Summary . . . 4

3.3 User Environment . . . 4

3.4 Summary of Key Stakeholder or User Needs . . . 4

3.5 Alternatives and Competition . . . 4

4 Product Overview **4**

4.1 Product Perspective . . . 4

4.2 Assumptions and Dependencies . . . 4

5 Product Features **4**

5.1 *<Feature name>* . . . 5

5.2 *<Feature name>* . . . 5

6 Non-Functional Requirements **5**

1. Introduction

[Explain that this document collects, analyzes, and defines the high-level needs and features of the product, the capabilities required by stakeholders and users, and why those needs exist.]

1.1 References

[List every document referenced by this Vision document, including title, identifier if applicable, date, publisher/organization, and an accessible source.]

No.	Document / source	Date / organization	Location
1	*<Title>*	*<Date and publisher>*	*<URL or repository path>*

2. Positioning

2.1 Problem Statement

[Summarize the problem, affected stakeholders, its impact, and the benefits of a successful solution.]

The problem of	*<Describe the problem>*
Affects	*<Stakeholders affected by the problem>*
The impact of which is	*<Consequences of the problem>*
A successful solution would	*<Key benefits of a successful solution>*

2.2 Product Position Statement

[State the product's intended market position and its primary differentiation.]

For	*<Target customer>*
Who	*<Need or opportunity>*
The MEDICAL SAFETY ASSISTANT	*<Product category>*
That	*<Compelling key benefit>*
Unlike	*<Primary competitive alternative>*
Our product	*<Primary differentiation>*

3. Stakeholder and User Descriptions

[Identify the stakeholders and users whose needs the project must represent. Describe their background and the problems that justify the requirements, rather than listing detailed system requirements here.]

3.1 Stakeholder Summary

[List interested parties who are not necessarily direct end users.]

Name / type	Description	Responsibilities and interest
<Stakeholder type>	*<Description>*	*<Interest, authority, or responsibility>*

3.2 User Summary

[List all identified user types and the stakeholder who represents each user's interests.]

User type	Description	Responsibilities / activities	Represented by
<Name>	*<Description>*	*<Main activities>*	*<Stakeholder>*

3.3 User Environment

[Describe where and how users perform their work, task frequency and duration, devices and platforms, connectivity, accessibility, privacy constraints, and integrations with other applications.]

3.4 Summary of Key Stakeholder or User Needs

[Describe the causes of each problem, how users solve it today, the desired solution, priority, and concerns.]

Need	Priority	Concerns / cause	Current solution	Proposed solution
<Need>	*<H/M/L>*	*<Concerns>*	*<Current approach>*	*<Proposed approach>*

3.5 Alternatives and Competition

[Identify competing products, manual/homegrown approaches, or maintaining the status quo. Summarize the strengths and weaknesses of each from the user's perspective.]

Alternative	Strengths	Weaknesses	Our differentiation
<Name>	*<Strengths>*	*<Weaknesses>*	*<Difference>*

4. Product Overview

[Give a high-level view of product capabilities, external interfaces, and system configuration.]

4.1 Product Perspective

[Explain whether the product is self-contained or part of a larger system. Identify relevant external systems, actors, data flows, and interfaces. A context or block diagram may be inserted here.]

4.2 Assumptions and Dependencies

[List factors that affect the product features. Include assumptions or dependencies whose change would require this Vision document to be revised.]

Type	Assumption / dependency	Effect if invalid or unavailable
<Assumption / Dependency>	*<Description>*	*<Effect>*

5. Product Features

[List and briefly describe externally visible, high-level capabilities that deliver user benefits. Focus on what and why, not implementation details. Keep descriptions understandable to all stakeholders and relate them to future use cases where appropriate.]

5.1 *<Feature name>*

[Describe the capability, intended users, value, major inputs/results, relevant usability concerns, and priority.]

5.2 *<Feature name>*

[Describe the capability, intended users, value, major inputs/results, relevant usability concerns, and priority.]

6. Non-Functional Requirements

[Define measurable quality requirements and constraints that globally affect the product: standards, platform and hardware, performance, security and privacy, safety, reliability, availability, usability, accessibility, maintainability, documentation, and external dependencies. Assign a priority where useful.]

ID	Category	Measurable requirement	Priority	Source
NFR-01	*<Security>*	*<State a verifiable requirement>*	*<H/M/L>*	*<Source>*
NFR-02	*<Medical safety>*	*<State a verifiable requirement, including safeguards for inaccurate or unsafe output>*	*<H/M/L>*	*<Source>*
